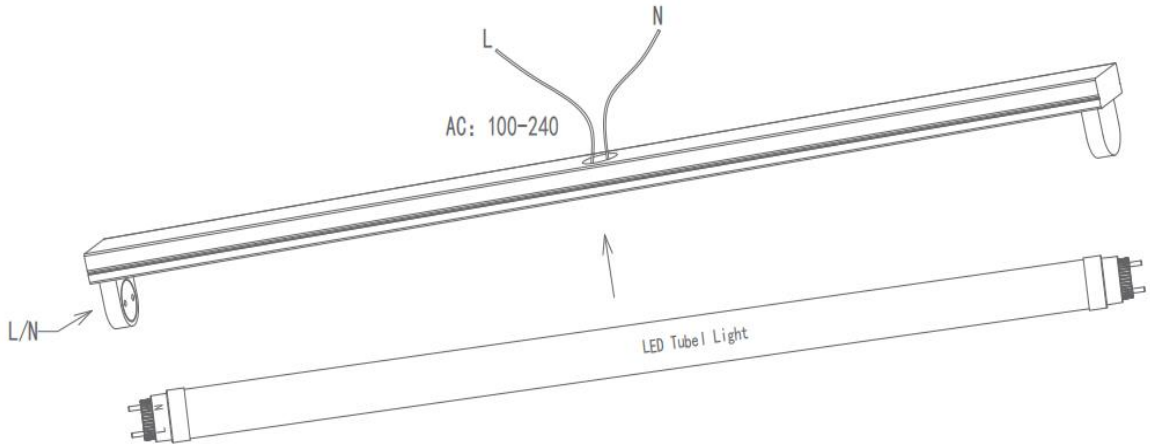
■ Installation and precautions:



Installation steps:

- ◆ Turn off the power before installation
- ◆ Make sure the working circuit conforms to the schematic diagram of the product or modify the circuit according to the power connection schematic diagram.
- ◆ Confirm the live end of the lamp holder, the other end cannot be connected to live line, and confirm which is the input end of the lamp.
- ◆ When the tube has a label with a clear AC input mark in one end and another end is short-circuit end, then the short-circuit end cannot be connected to the power inlet of the bracket.
- ◆ Install the tube in the bracket correctly and check whether it has been installed properly.
- ◆ Close the power switch to energize after above steps all finished

Precautions:

- ◆ Make sure to disconnect the power supply before installing or removing the lamp
- ◆ and use the lamp in the rated voltage range.
- ◆ Indoor use only, do not use this product in high humidity or dusty environment.
- ◆ Contact the professional maintenance staff to handle if there is any defection.
- ◆ Do not look at the lamp for long time when the lamp is working,
- ◆ because the high-brightness light source may cause eye discomfort or damage.
- ◆ This lamp is a non-dimmable product, please do not use it with a dimmer.
- ◆ The lamp should not be used near flammable objects

- ■ Warning: The lamp can't be covered by heat heat-proof pad or similar material.
- ■ Warning: To reduce the risk of fire and clicks, do not modify the external structure of the lamp (aluminum groove and end cover) and internal parts by yourself.
- ■ Warning: In order to reduce the risk of fire and clicks, the mechanics shall understand the electrical system if they need to install the lamp setting.
- ■ Warning: To prevent damage or abrasion of the wire, please do not expose the wire to the edge of a metal sheet or any other sharp objects.
